4.Activities

Title	First Author	Page
4-1 Accelerators		
<i>Linac</i>		
Alignment of the SPring-8 Linac	Mizuno, A.	96
Current Status of Control System for SPring-8 Linac	Sakaki, H.	98
Analog Processor for Emittance Monitor	Yanagida, K.	100
<i>Synchrotron</i>		
Magnet System of SPring-8 Booster Synchrotron	Fukami, K.	101
Development of the Pulse Magnets for the Booster Synchrotron of SPring-8	Yonehara, H.	103
Alignment of Magnets for the SPring-8 Synchrotron	Fukami, K.	105
Calibration of Beam Position Monitor for the SPring-8 Synchrotron	Aoki, T.	107
High Accurate Timing System for the SPring-8 Synchrotron	Suzuki, H.	109
<i>Storage Ring</i>		
Magnetic Field Measurements of Prototype Steering Magnets for the SPring-8 Storage Ring	Kumagai, K.	111
Magnetic Performance of Prototype Bump Magnet for the SPring-8 Storage Ring	Kumagai, K.	113
Summary of Field Measurement for SPring-8 Storage Ring Magnets	Ohnishi, J.	115
First Alignment Results of the Storage Ring Magnet Units	Zhang, C.	117

Positioning the Storage Ring Dipole Magnets	Ouyang, X.	119
Straightness Measurement of Mechanical Centers of Magnetic Pole for Alignment Check of the Storage Ring	Matsui, S.	121
Some Alignment Instruments for SPring-8 Storage Ring Magnets	Sasaki, Y.	123
Conditioning Program for RF Input Couplers and Cavities	Ohshima, T.	125
Vacuum Chambers for Injection Section	Bizen, T.	126
Outgassing Rate of Magnetic Stainless Steel	Bizen, T.	128
The Pre-bakeout and Vacuum Tests for the Vacuum Chambers Before Installation in the SPring-8 Storage Ring	Iizuka, M.	130
Displacement and Deformation of Vacuum System Installed in the SPring-8 Storage Ring	Masaki, M.	132
Present Status of Calibration of rf-BPM for the SPring-8 Storage Ring	Sasaki, S.	134
On Synchrotron Radiation from Electrons Moving in Edge Field of a Bending Magnet on the SPring-8 Storage Ring	Takano, S.	136
Redesigned Vacuum Control System for the SPring-8 Storage Ring	Higashiura, T.	138
A Feedback Test Bench Equipped with Digital Signal Processor	Xu, W.	140
Minimum Effective Emittance in Synchrotron Radiation Sources Composed of Modified Chasman Green Lattice	Tanaka, H.	142
Estimation of Injected Beam Energy Based on Parameter Analysis of First Turn Horizontal Trajectory with Propagation Matrix	Tanaka, H.	143
Estimation of Injected Beam Energy Based on Central Shift of First Turn Horizontal Trajectory	Tanaka, H.	145

Estimation of Local Betatron Functions and Phase Advances of Betatron Oscillations	Tanaka, H.	147
Tunability of Betatron Functions in the SPring-8 Storage Ring	Soutome, K.	149
Longitudinal and Transverse Impedance of The SPring-8 Storage Ring	Nakamura, T.	151
Estimation Scheme of Longitudinal and Transverse Impedance	Nakamura, T.	153
Characteristics of Impedance of Small Grooves	Nakamura, T.	155
Development of the Single-Bunch Instabilities Simulation Code SISR	Nakamura, T.	157
The Coupled-Bunch Instabilities Simulation Code CISR - Longitudinal Motion -	Nakamura, T.	159
The Coupled-Bunch Instabilities Simulation Code CISR - Transverse Motion -	Nakamura, T.	161
Cure of Transverse Instabilities by Chromaticity Modulation	Nakamura, T.	163
Study on Stability Limit of a Single Particle Motion Due to RF Sextupole Magnets	Tanaka, H.	165
The Three-Dimensional Free Electron Laser Simulation Code ELFIN	Nakamura, T.	168
Production of Low Energy Positrons with Synchrotron Radiation	Ando, A.	170
Feasibility of Constructing a Facility of Backward Compton Scattering in the Storage Ring	Daté, S.	172

4-2 Experimental Facilities

Insertion Devices

Status of Field Measurement of the First Insertion Device	Tanaka, T.	173
Development of In-Vacuum Minipole Undulator	Tanabe, T.	175

Experimental Study of Quasi-periodic Undulator	Takao, M.	177
--	-----------	-----

Front Ends

Heat Load Test for Graphite Filters by Electron Beam Irradiation on the SPring-8 Front End	Mukaikubo, H.	179
The Diamond Beam Position Monitor and Test at TSLF	Sakae, H.	181
Design of a Pre Slit for The SPring-8 Undulator Beamlines	Takahashi, S.	183
Conceptual Design on an Interlock X-ray Monitor	Aoyagi, H.	185
SPring-8 Front End Experimental Report for Heat Transfer of Water-cooled Channel	Amamoto, H.	187

Optics

Reflectivity Measurements of Supermirrors for 9 to 40 keV	Uruga, T.	189
Sagittal Focusing of the Adjustable Inclined Monochromators for Bending Magnet Beamlines	Furukawa, Y.	191
Performance of Water-Cooled Silicon Crystal with Pin-Post Cells	Kuroda, M.	193
Bent Crystal Monochromators for High Energy Synchrotron Radiation (I)	Yamaoka, H.	195
Cryogenically-cooled Monochromators	Yamaoka, H.	197
The Finite Element Analysis of the Monochromator Crystal with Water-Cooled Pin-Post Structure	Ohtomo, K.	198
Evaluation of Bragg Fresnel Zone Plate for the Hard X-ray Focusing	Kohmura, Y.	200

Detectors

Improved Simulation of the Response Function of Si(Li) Detector	Goto, S.	202
---	----------	-----

Performance of a Proportional Scintillation X-ray Imaging Chamber (II)	Suzuki, M.	204
--	------------	-----

4-3 Synchrotron Radiation Experiments

Structure of β -phase AuZn Alloy under High Pressure	Makita, T.	206
--	------------	-----

4-4 Safety

Calculation of Gas Bremsstrahlung and Associated Photoneutron at SPring-8 Insertion Device Beamline	Asano, Y.	207
---	-----------	-----

Measurement of Glass Dosimeter Response for Low Energy Photon Using Synchrotron Radiations	Asano, Y.	209
--	-----------	-----

4-5 Others

Present Status of the Information Network System for SPring-8	Takebe, H.	211
---	------------	-----
