<b>1. Overview of the SPring-8 Project</b>	<b>1</b>
<b>2. Administration</b>	
Administration	3
Facility Management and Development	7
SPring-8 Research Promotion and User Support	8
SRI'97	10
The 11th Symposium on Accelerator Science and Technology	12
<b>3. Facilities</b>	
<b>3-1 Accelerators</b>	
Accelerator Division - General -	13
Injector	
Linac	15
Synchrotron	18
Storage Ring	
Magnets, Power Supplies and Alignment	20
RF System	23
Vacuum System	25
Beam Diagnostics	27
Control System	29
Beam Dynamics	32
<b>3-2 Experimental Facilities</b>	
Experimental Facilities - General -	35
Transport Channel and Optics	40
SPring-8 Detector Projects	42
List of Beamlines	
Public Beamlines	
XAFS (BL01B1)	44
The Beamline BL01B1 for X-ray Spectroscopy (XAFS)	46
Crystal Structure Analysis (BL02B1)	48
First Experiments at BL02B1 and Some Results on Structural Phase Transition SG	50
Small Crystal Diffraction Experiment with Vacuum Camera for Structural Analysis Beamline	52
High-resolution Powder Diffraction Experiments at BL02B1	55
Diffuse Scattering	57
High Temperature Research (BL04B1)	59
X-ray Diffraction Measurements for Expanded Fluid Mercury using Synchrotron Radiation	61

High Pressure Mineral Physics	63
Present Status of Beamline BL08W for High Energy Inelastic Scattering	65
Opening of Compton Scattering Beamline	68
Nuclear Resonant Scattering (BL09XU)	70
Nuclear Resonant Scattering	71
The Outline of Extremely Dense State BL10XU	73
Structural Properties of Extremely Dense Materials Subgroup	75
Rapid & Sensitive XAFS using Tunable X-ray Undulator	77
Soft X-ray Spectroscopy of Solids (BL25SU)	79
Soft X-ray Spectroscopy of Solids	80
Soft X-ray Photochemistry (BL27SU)	83
Soft X-ray Photochemistry	85
Physicochemical Analysis (BL39XU)	88
X-ray Magnetic Absorption and Scattering (XAFS)	91
Spectrochemical Analysis	95
Medical Application (SR-XRF group)	99
Bio-crystallography (BL41XU)	101
Bio-crystallography	103
Biomacromolecules (Crystal)	108
JAERI Beamlines (BL11XU, BL14B1, BL23SU)	
JAERI Beamlines	110
BL11XU	111
BL14B1	114
BL23SU	118
RIKEN Beamlines (BL44B2, BL45XU)	
RIKEN Beamline for Structural Biology	121
Contract Beamline (Hyogo BL24XU)	125
Contract Beamline (Osaka University BL44XU)	131
<b>3-3 Safety Office</b>	133
<b>3-4 Present Status of the Information Network System for SPring-8</b>	136
<b>3-5 Conventional Facilities</b>	140
<b>3-6 Utilities</b>	145
<b>4. Activities</b>	
<b>4-1 Accelerators</b>	
<i>Linac</i>	
Photocathode RF Gun Development for SPring-8 Linac	T. TANIUCHI 152
Study of Linac Based Single Pass FEL	K. YANAGIDA 155
Stability of the RF System at SPring-8 Linac	T. ASAKA 157

## ***Synchrotron***

Several-bunch Beam-operation of SPring-8	H. SUZUKI	160
Estimation of Alignment Accuracy of the SPring-8 Synchrotron	K. FUKAMI	162

## ***Storage Ring***

Commissioning of the RF System of the SPring-8 Storage Ring	H. EGO	165
Acceleration Voltage Calibration by Synchrotron Frequency Measurement	T. OHSHIMA	167
Diffraction Limited Resolution of a Synchrotron Radiation Beam Profile Monitor	M. MASAKI	169
Laser-electron-photon Beamline BL33LEP	Y. OHASHI	172
Model Calibration via Measurement of Betatron Functions and Phase Advances	G. LIU	174
Alignment Procedures of the New SUBARU Ring Magnets	S. MATSUI	177
Making Alignment Datums for the New SUBARU Ring	C. ZHANG	180
Perturbative Formulation of the Nonlinear Dispersion	M. TAKAO	183
Method to Control Coupling Ratio in SPring-8 Storage Ring	H. TANAKA	185
Calibration of Beam Position Monitors using a Stored Beam	H. TANAKA	188
Model Calculations of Optics for the SPring-8 Storage Ring	K. SOUTOME	191
An Observation of the Long Term Stability of the Electron Beam Trajectory in the Storage Ring of SPring-8	S. DATÉ	194

## ***Others***

The Status of New SUBARU	New SUBARU Project Team	197
Development of a New SR Beam Monitor using Compton Scattering	T. KUDO	200

## **4-2 Experimental Facilities**

### ***Insertion Devices***

Beam Position Alarm : ID Radiation Interlock System using rf-BPMs	T. KUDO	203
---	---------	-----

### ***Front Ends***

Electronics of XBPMs for the SPring-8 Beamlines	T. KUDO	205
Commissioning of Absorbers for High Heat Load X-ray Undulator Beamlines at SPring-8	T. MOCHIZUKI	208
Development of X-ray Beam Position Monitor for Bending Magnet Beamline at SPring-8	H. SHIWAKU	210
Measurements of Spatial Distribution of Radiated Power from the SPring-8 Undulators using the Thin Foil I <sub>0</sub> Monitor	M. OURA	212

Design of a Pre Slit for the SPring-8 Undulator Beamlines (3)	S. TAKAHASHI	215
Thin Foil I0 Monitor as an Aligning Tool for the Front-end Slits of the SPring-8 Undulator Beamline	M. OURA	217
Performance of X-ray Beam Position Monitors for ID Beamlines	H. AOYAGI	220
Graphite Wire Monitor Tested at BL47XU	H. AOYAGI	222
<b>Detectors</b>		
MicroStrip Gaseous Chamber for Realtime X-ray Imaging Detector at RIKEN Beamline I	H. TOYOKAWA	224
The Behavior of Ionization Chambers under the Irradiation of High Flux X-ray Beam	K. SATO	225
Basic Characterization of a Multiple CCD X-ray Detector and its First On-beamline Test	T. KUMASAKA	228
A CCD-based Beam Monitor	N. YAGI	230
<b>Optics</b>		
Characterization of a 300keV Monochromator for High Energy Synchrotron Radiation	H. YAMAOKA	231
Focusing Property by a Bent Crystal for High Energy Synchrotron Radiation	H. YAMAOKA	232
Development of Trichromator at SPring-8 RIKEN Beamline I	M. YAMAMOTO	233
Polarization Conversion using Diamond X-Ray Phase Retarder at BL39XU	M. SUZUKI	235
Current Status of Small-angle Scattering Experiments at BL-45	T. FUJISAWA	238
Evaluation of the X-ray Bubble Lens	Y. KOHMURA	239
<b>Others</b>		
Characterization of the Elliptical Multipole Wiggler (BL08W)	M. MIZUMAKI	241
Production of Multiply Charged Ion Target for Photoionization Studies using Synchrotron Radiation in the Soft X-ray Region	M. OURA	242
<b>4-3 Synchrotron Radiation Experiments</b>		
The Study of the Magnetically Excited State by using Mösbauer Time Spectra with Polarization Analyzer Crystal	T. MITSUI	244
Inelastic Nuclear Resonance Scattering from FeCl <sub>3</sub> -Graphite Intercalation Compounds	S. KITAO	245
<b>5. Public Beamline User Reports</b>		
SPring-8 User Report		246
Proposal List of Public Beamline Experiments in 1997		248
<b>BL01B1</b>		
Studies on the Structure of Pd Supported on Zeolites by XAFS	K. OKUMURA	251

Studies on the Structure of WO <sub>3</sub> Dispersed over ZrO <sub>2</sub> by XAFS	K. OKUMURA	252
Solvation Structures of Iodide Anion in Various Solvents	I. WATANABE	253
Total Reflection XAFS of Aqueous Solution Surface	I. WATANABE	254
XAFS Study on Liquid Te and I under high temperature and high pressure	Y. KATAYAMA	255
XAFS Study on EuC <sub>60</sub>	Y. KUBOZONO	256
XAFS Analysis of Dilute Zr, Nb and Mo Species in Metal Oxide Matrices	T. TANAKA	257
Characterization of BL01B1	S. EMURA	258
General evaluation of XAFS beamline I -XAFS in the high energy region-	Y. NISHIHATA	259
Evaluation of Energy Resolution of BL01B1 Using XANES Spectra of Various Metal Ions	T. TANAKA	260
XAFS Studies of Local Structure of Thin Film of Alkali Halide Single Crystals	T. MURATA	261
Preliminary results of fluorescence Cu K-edge XAFS spectra and high energy K-edge XAFS spectra of AgI-related Samples	H. KAGEYAMA	262
XAFS spectrum observation system at BL01B1	M. TAKAHASHI	263
Comparison of conversion electron yield and transmission EuK -XAFS spectra for Eu <sub>2</sub> O <sub>2</sub> CN <sub>2</sub>	M. TAKAHASHI	264
EXAFS Measurements of Nd <sup>3+</sup> -doped Alkali Silicate Glasses on the Nd K-edge	H. YAMAGUCHI	265

### ***BL02B1***

High-Resolution Powder Diffraction Experiments at BL02B1	H. TORAYA	266
Precursor Phenomena on the First-Order Phase Transition in Ferroelastic Compounds	Y. KUROIWA	267
A Structural Study of Fullerene Compounds by the Maximum Entropy Method	M. TAKATA	268
Structural Fluctuation in Ternary Alloys	K. OHSHIMA	269
Lattice Modulation and Charge Ordering Associated with the Spin Ordering in CeP	Y. NODA	270
Phase Transition of Hexagonal BaTiO <sub>3</sub>	Y. NODA	271
Precise Crystal Structure Analysis of K <sub>3</sub> H(SO <sub>4</sub> ) <sub>2</sub> by High Energy X-ray Diffraction Method	H. KASATANI	272
A preliminary Study on the surface diffraction from SiO <sub>2</sub> /Si(001) interface	I. TAKAHASHI	273
Structure refinements of a GeO <sub>2</sub> rutile single crystal at 6GPa using hard X-rays of 25 and 50 keV	T. HATTORI	274
Highly Accurate Measurement of Electron Density Distribution in Transition-Metal Complexes with SR and Vacuum Camera	K. TANAKA	275

Single Crystal Analyses of e-O <sub>2</sub> High-Pressure Phase of Solid Oxygen	Y. AKAHAMA	276
Development of Electronic Excited State Crystallography by Modulation Method with Imaging Plate Detector	Y. OZAWA	277
X-ray Diffraction Study on Ultra-Thin Barium Titanate Films Grown by Reactive Evaporation	K. SAKAUE	278
X-ray Structure Analysis of Host-Guest Organic MicroCrystals	Y. TAKENAKA	279
Micro-Crystal Structure Analysis and Its Application to the Study of Photo-Induced Structural Change of the Metal Complex	K. TORIUMI	280
High-resolution X-ray Diffraction Study on Artificially Grown Quasi-Periodic Superlattices	K. SAKAUE	281
<b>BL04B1</b>		
Structure and Equation of State Study of Mantle Minerals Through in situ X-ray Observaion	T. YAGI	282
In situ X-ray Diffraction study of the phase transformations, melting behaviours, and rheological properties of the earth's materials at high pressure and high temperature	T. IRIFUNE	283
In situ X-ray diffraction study on kinetics of decomposition of spinel Mg <sub>2</sub> SiO <sub>4</sub> at high pressure and temperature	T. KUBO	284
Pressure Induced Phase Transition of CdI <sub>2</sub> -type PbI <sub>2</sub> Precise determination of phase relations in the system Mg <sub>2</sub> SiO <sub>4</sub> -Fe <sub>2</sub> SiO <sub>4</sub> at high pressures	O. OHTAKA	285
	T. KATSURA	286
In situ observation of graphite to diamond transition using catalysts	W. UTSUMI	287
The determination of the P-T phase diagram of PbZrO <sub>3</sub>	S. ENDO	288
X-ray Diffraction Measurements for Expanded Fluid Selenium	M. INUI	289
X-ray Diffraction Measurements for Expanded Fluid Mercury	K. TAMURA	290
In-situ observation of first sharp diffraction peak for amorphous SiO <sub>2</sub> under high pressures	N. KITAMURA	291
<b>BL08W</b>		
Successful Operation of Noble Equipment for Magnetic Compton-Profile Measurements at the BL08W	N. SAKAI	292
Measurement of Degree of Circular Polarization of 274-keV X-Rays	M. MIZUMAKI	293
Performance of a Monochromator for 300-keV X-Rays	H. YAMAOKA	294
<b>BL09XU</b>		
The study of the Perturbed Nuclear Resonant Scattering	T. MITSUI	295
X-ray inelastic scattering of myoglobin	T. HARAMI	296
Surface Structure analysis of solid liquid interfaces	M. NAKAMURA	297

Development of Nuclear Resonant Inelastic Scattering Technique	M. SETO	298
Performance Test of the Goniometer for Surface and Interface Analysis	T. TAKAHASHI	299
Nuclear-Resonance Scattering of Ferromagnetic Amorphous Alloy	S. NASU	300
Nuclear resonant scattering by the nuclei with high transition energy	Y. YODA	301
Fundamental process of nuclear resonant scattering	Y. YODA	302
<b>BL10XU</b>		
Structure Analysis of Tetrahedral-Molecular Crystal and Amorphous at High Pressure	N. HAMAYA	303
Structural Phase Transition of Molecular Solids under High Pressure	H. KAWAMURA	304
X-ray diffraction study of sulfur laser-heated at 11GPa	N. SAKURAI	305
Density of Liquid Te and Bi under High Temperature and High Pressure	Y. KATAYAMA	306
Crystal Structure Analyses of Solid Oxygen High-Pressure Phases and Research for Molecular Dissociation	Y. AKAHAMA	307
<b>BL27SU</b>		
High Resolution Resonant Auger Electron Spectroscopy of Atoms and Molecules	I. H. SUZUKI	308
<b>BL39XU</b>		
X-ray fluorescence holography of Zn in GaAs:Zn	K. HAYASHI	309
Development of high energy resolution detectors for trace chemical characterization	K. SAKURAI	310
Chemical characterization of ultra trace metals in small liquid drop	K. SAKURAI	311
Analyses of thin films interfaces by X-ray fluorescence and scattering using total reflection	K. SAKURAI	312
X-ray Magnetic Diffraction of Iron with A Phase Plate on Au Undulator Beamline	M. ITO	313
Bio-medical application of Total reflection X-ray fluorescence analysis	I. NAKAI	314
High resolution x-ray fluorescence spectroscopy and spin selective XAFS	S. HAYAKAWA	315
Chemical state analysis of trace elements with a scanning x-ray microprobe	S. HAYAKAWA	316
Efficiency Test of Diamond Phase Retarder and Polarization Analysis	H. MARUYAMA	317
X-ray Resonant Magnetic Scattering and Polarization Dependence	H. MARUYAMA	318
XMCD Measurements at K-Edge using Diamond Phase Retarder	H. MARUYAMA	319
XMCD Measurements at Pt L <sub>3</sub> -Edge in Fe-Pt Alloys	H. MARUYAMA	320

**BL41XU**

Structure analysis of bacterial flagellar filament by X-ray fiber diffraction	K. HASEGAWA	321
Structure of Diol Dehydrase containing Vitamin B12 analogue	N. SHIBATA	322
X-ray Crystallographic Study of Pink Color Chromoprotein from <i>Pleurotus Salmoneostramineus</i> L.Vass	Y. KAI	323
X-ray crystallographic Studies on Tobacco Necrosis Virus, Peroxidase, and $\alpha$ -Amylase inhibitor	K. FUKUYAMA	324
Mechanism for thermo-stabilization of enzymes from view of the three dimensional structure	Y. YOSHIKE	325
X-ray crystallography of aminoacyl-tRNA synthetases complexd with tRNA	O. NUREKI	326
X-ray crystallographic studise on hematopoietic and lipocalin type PGDS	M. MIYANO	327
Crystal structure analysis of $\alpha$ - and $\beta$ -amylases from <i>Bacillus</i> species	T. YAMANE	328
Test for the Routine Structure Analysis of Biological Macromolecules at the Bio-Crystallography Beamline	N. KAMIYA	329
Tuning of the Bio-Crystallography Beamline	Y. KAWANO	330
X-ray crystal structure analysis of ribosomal protein S7 by MAD	A. NAKAGAWA	331
Evaluation of Performance of the Bio-Crystallography Beamline by Means of Refinement of High-Resolution Crystal Structure	M. FUJIHASHI	332
Date Collection of Phenylethylamine Oxidase from <i>Arthrobacter globiformis</i> at Low Temperature	H. YAMAGUCHI	333
Structures of <i>Escherichia coli</i> and Mouse 8-Oxo-dGTPase that Hydrolyze the Mutagenic 8-Oxo-dGTP to 8-Oxo-dGMP	Y. YAMAGATA	334
High Resolution X-ray Crystallographic Analysis of Cytochrome c Oxidase	H. SAKAI	335
Mechanism of Proton Pumping of Cytochrome c Oxidase based on its Crystal Structure	S. YOSHIKAWA	336
X-ray fiber diffraction from the native thin filament and F-actin sols	T. ODA	337
Crystal structure of Phe-tRNA-synthetase from <i>T.thermophilus</i> in complex with phenylalanyl-adenylate	D. VASSYLYEV	338
Protein crystallography of muscle tropomyosin and complexes of tropomyosin with other proteins	Y. MAEDA	339
X-ray structure analysis of drug-resistant HIV-1 protease, and protease inhibitor complexes, and rHCAI and substate/ inhibitor complexes	M. HOSUR	340

**BL45XU (RIKEN Beamline)**

Tests of the Small-angle Beamline for X-ray Diffraction Experiments on Skeletal Muscles	N. YAGI	341
---	---------	-----

X-ray Solution Scattering of Biological Supramolecules on an Undulator Radiation Source	Y. INOKO	342
Structural Analysis during the Photocycle of Bacteriorhodopsin revealed by Time Resolved X-ray Diffraction	F. TOKUNAGA	343
Stability of Solution Structure and Photo-Induced Structural Changes of Photoactive Yellow Protein with Use of Mutants	N. HAMADA	344
