</table>
Trace element mapping of a single cell using a hard X-ray nanobeam focused by a Kirkpatrick-Baez mirror system

S. Matsuyama and K. Yamauchi

Hard X-ray phase-difference microscopy using self-imaging phenomenon of a transmission phase grating

W. Yashiro and A. Momose

**Materials Science: Structure** 48

Face-centered-cubic structured Cs$_3$C$_6$O$_6$: the Holy Grail of fulleride superconductivity

K. Prassides and M. J. Rosseinsky

Crystal orientation and thickness dependence of the superconducting transition temperature of tetragonal FeSe$_{1-x}$, thin films

M. J. Wang, T. W. Huang and M. K. Wu

Morphotropic phase boundary in ferromagnets - a way leading to large magnetostriction

S. Yang and X. Ren

Symmetry switch of cobalt ferrocyanide framework by alkaline cation exchange

Y. Moritomo and T. Matsuda

Photoinduced guest trapping and conversion by photoresponsive nanoporous crystal

R. Matsuda, H. Sato and S. Kitagawa

How do phase-change materials crystallize so fast?

N. Yamada, T. Matsunaga and M. Takata

Formation of nano-oriented crystals of iPP with ultrahigh performance crystallized by extreme melt elongation

K. N. Okada and M. Hikosaka

Dual energy K-edge subtraction imaging of 3D inhomogeneous microstructure in highly alloyed aluminium foam

Q. Zhang and H. Toda

Three-dimensional electron density mapping of shape-controlled nanoparticle by focused hard X-ray diffraction microscopy

Y. Takahashi and N. Zettsu

**Materials Science: Electronic & Magnetic Properties** 68

Study of oxygen migration at Pt/HfO$_2$/Pt interface by bias-application hard X-ray photoelectron spectroscopy

T. Nagata, Y. Yamashita and K. Kobayashi

Tunable strongly correlated oxide semiconductors revealed by hard X-ray photoemission spectroscopy

H. Tanaka, H. Takami and S. Ueda

Nesting driven spin spiral in ultrathin Fe/Cu (001) films

J. Miyawaki, A. Chainani and S. Shin

Symmetry of wavefunction in perpendicular magnetic anisotropy films

H. Sakurai

Anisotropic phonon density of states in FePt nanoparticles with $L1_0$ structure

Y. Tamada, T. Ono and S. Nasu

Novel magnetic domain structure of iron meteorite observed by photoelectron emission microscopy (PEEM)

M. Kotsugi
Complete assignment of 3D spin axes of antiferomagnetic domain structures of NiO: Combined study of MLD-PEEM and cluster model calculation .......................... 82
K. Arai, A. Tanaka and T. Kinoshita

CHEMICAL SCIENCE ........................................................................................................ 84

Photoelectron-recoil-induced rotational excitation ......................................................... 86
T. D. Thomas, E. Kukk and K. Ueda

Structural and dynamical properties of water under high temperatures and pressures revealed by combining first principles molecular dynamics simulations and in situ X-ray diffraction experiments
T. Ikeda and Y. Katayama

Epitaxial graphene on silicon substrates ........................................................................ 90
H. Fukidome and M. Suemitsu

Observation of a Li cation encapsulated in a C₆₀ fullerene cage by single-crystal charge density analysis
S. Aoyagi, E. Nishibori and H. Sawa

Surface molecular architecture: Highly crystalline metal-organic framework nanofilms assembled by Langmuir-Blodgett and layer-by-layer methods
R. Makura and H. Kitagawa

Photoresponsive soft material by large-scale molecular ordering of a polymer brush
T. Kajitani

Highly selective sorption of oxygen and nitric oxide by an electron-donating flexible porous coordination polymer
R. Matsuda, S. Shimomura and S. Kitagawa

Discovery of ‘bicontinuous cubic’ liquid crystalline mesophase from discotic molecules
Y. Yamamoto

Structure of liquid and glassy ZnCl₂ ............................................................................. 94
A. Zeidler, P. S. Salmon and T. Usuki

Studies of the degraded state of excavated archaeological silk fibers using infrared microspectroscopy
M. Akada, M. Sato and M. Okuyama

Earth & Planetary Science ............................................................................................... 106

Structure of iron in Earth’s inner core .......................................................................... 108
S. Tateno

Phase transitions, element partitioning, and density changes in a model lower mantle composition
T. Irifune

Elastic properties of ice VII and its high-pressure polymorphs ........................................ 110
Y. Asahara

Back transformation kinetics of majoritic garnet and implication for ascending rate of diamond
M. Nishi, T. Kubo and T. Kato

Quantitative analysis of minerals in meteorite chips by SR-X-ray microcomputated tomography
M. Uesugi, K. Uesugi and M. Oka

Epitaxial graphene on silicon substrates ........................................................................ 90
H. Fukidome and M. Suemitsu

Observation of a Li cation encapsulated in a C₆₀ fullerene cage by single-crystal charge density analysis
S. Aoyagi, E. Nishibori and H. Sawa

Surface molecular architecture: Highly crystalline metal-organic framework nanofilms assembled by Langmuir-Blodgett and layer-by-layer methods
R. Makura and H. Kitagawa

Photoresponsive soft material by large-scale molecular ordering of a polymer brush
T. Kajitani

Highly selective sorption of oxygen and nitric oxide by an electron-donating flexible porous coordination polymer
R. Matsuda, S. Shimomura and S. Kitagawa

Discovery of ‘bicontinuous cubic’ liquid crystalline mesophase from discotic molecules
Y. Yamamoto

Structure of liquid and glassy ZnCl₂ ............................................................................. 94
A. Zeidler, P. S. Salmon and T. Usuki

Studies of the degraded state of excavated archaeological silk fibers using infrared microspectroscopy
M. Akada, M. Sato and M. Okuyama

Earth & Planetary Science ............................................................................................... 106

Structure of iron in Earth’s inner core .......................................................................... 108
S. Tateno

Phase transitions, element partitioning, and density changes in a model lower mantle composition
T. Irifune

Elastic properties of ice VII and its high-pressure polymorphs ........................................ 110
Y. Asahara

Back transformation kinetics of majoritic garnet and implication for ascending rate of diamond
M. Nishi, T. Kubo and T. Kato

Quantitative analysis of minerals in meteorite chips by SR-X-ray microcomputated tomography
M. Uesugi, K. Uesugi and M. Oka
Environmental Science

Mechanism of antimony immobilization in contaminated soil under reducing condition .................................................. 120
S. Mitsunobu

Tracking the pathway of diesel exhaust particles from nose to brain ................................................................. 122
by micro-X-ray florescence analysis
Y. Masui and N. Sakai

Transformations of soil Pb species by plant growth and phosphorus amendment: .................................................. 124
Phytoremediation and metal immobilization technologies
Y. Hashimoto and M. Takaoka

EXAFS study on the cause of enrichment of heavy rare earth elements on bacterial cell surfaces ......................... 126
Y. Takahashi

Vapochromic behaviors of organic crystals: A convenient and versatile chemical sensor for sick house gas detection . 128
H. Takaya, E. Takahashi and T. Naota

XAFS studies on the formation of atomic Pd active in the Suzuki coupling reactions ............................................. 130
K. Okumura

Industrial Applications

Zr inclusions revealed by microcomputed tomography observations on the CO₂ laser ................................................. 134
fusion splicing interface between single-mode optical fibers
S. Koike, S. Asakawa and J. Kobayashi

Structure analysis of nanoparticle dispersed in transparent resin using synchrotron X-ray scattering ................. 136
K. Senoo

Observation of fatigue crack propagation in laser-peened aluminum alloy ......................................................... 138
by computed tomography with synchrotron radiation
K. Masaki and Y. Sano

High-resolution three-dimensional computed tomography for materials from industrial field ........................ 140
H. Takano, Y. Urushihara and J. Matsui

Measurement of the internal stress distribution in grains of stainless steel using white X-ray microbeam diffraction .. 142
K. Kajiwara, M. Sato and T. Yamada

Nuclear Physics

Incoherent φ-meson photoproduction from deuterium .............................................................................................. 146
W. C. Chang

Backward-η meson photoproduction at BL33LEPS ............................................................................................... 148
M. Sumihama
Accelerators & Beamlines Frontiers

Beam Performance

- Developments and Upgrades of Storage Ring and Booster Synchrotron
- Developments and Upgrades of Linac

Controls & Computing

- Wide-area remote experiment system at SPring-8

New Apparatus, Upgrades & Methodology

- In situ field measurement and correction for in-vacuum undulators
- Formation of sub-10nm hard X-ray beam
- Total reflection zone plate for 15 nm line focus of 10 keV X-rays
- Development of Fourier transform holography imaging using soft and hard X-rays
- Development of scanning X-ray microscope using microdiffraction
- Development of silicon and cadmium telluride pixel detectors

Facility Status

- Introduction
- Machine Operation
- Beamlines
- User Program and Statistics
- Budget and Personnel
- Research Complex
- Users Societies, Conferences and Other Activities

Project XFEL

- Progress of the XFEL Project

NewSUBARU

- Major Activity of NewSUBARU

Note: The principal publication(s) concerning each article is indicated with all author's names in italics in the list of references.
