

SPRING-8/SACLA Research Frontiers 2024 CONTENTS

Preface	5
Editor's Note	6
Scientific Frontiers	7
Reviews	
Ultra-precision valence electron density analysis: Unlocking quantum parameters with synchrotron X-ray diffraction <i>H. Sawa</i>	8
 Artificial photosynthesis utilizing solid semiconductors and molecular metal complexes <i>T. Morikawa</i>	12
Life Science	
 Enzymatic Reaction: Time-resolved crystallography of ultrafast light driven DNA repair by photolyases <i>Y. Bessho, M. Maestre-Reyna, L.-O. Essen and M.-D. Tsai</i>	16
 Enzymatic Reaction: Time-resolved protein crystallography – Structural changes of the catalyst for water oxidation captured by XFEL <i>J.-R. Shen and M. Suga</i>	18
 Capturing Chemical Reaction: Protein crystal as a host to study small molecule reaction by time-resolved serial femtosecond crystallography <i>B. Maity, S. Abe and T. Ueno</i>	20
Protein Crystallography: Key structural differences between green and red fluorescent proteins <i>H. Imamura and K. Imada</i>	22
Protein Crystallography: High-throughput structure determination of an intrinsically disordered protein <i>M. Kojima, S. Abe and T. Ueno</i>	24
Protein Crystallography: Structural insights into cancer cell-specific recognition by H ₂ Mab-214, a novel anti-HER2 antibody <i>T. Arimori</i>	26
Protein Crystallography: Structural characterization of the unique pH-responsive anti-TIGIT therapeutic antibody Ociperlimab <i>X. Zhang and J. Sun</i>	28
Protein Crystallography; Enzyme Mechanisms: Zn-containing immature structure of a Rieske-type iron-sulfur protein <i>K. Takeda</i>	30
Structural Biology: CryoEM and SAXS studies on metastable conformations appearing in cofactor-ligand association and catalysis of glutamate dehydrogenase <i>T. Wakabayashi, M. Oide and M. Nakasako</i>	32
Dark-field X-ray Imaging: Visualizing magnetic control of nanoparticles for airway gene therapy using ultrafast <i>in vivo</i> dark-field X-ray imaging <i>R. Smith, K. Morgan and M. Donnelley</i>	34

Synchrotron Microangiography: Increased cardiac muscle calcium sensitivity is associated with impaired coronary vascular flow – Implication for hypertrophic cardiomyopathy <i>J. T. Pearson, V. Sequeira and M. T. Waddingham</i>	36
--	----

Living Cell Imaging: Observation of mammalian living cells by a femtosecond single-shot exposure of a soft X-ray free electron laser <i>S. Egawa, M. Shimura and T. Kimura</i>	38
--	----

Physical Science

Non-equilibrium Supertextures Formation: Tracking ultrafast and irreversible creation of light-induced structural orders <i>H. Wen, V. Gopalan and J. W. Freeland</i>	40
---	----

Ultrafast Plasma Physics: Femtosecond X-ray imaging of isochorically heated solid-density plasmas with XFELs <i>H. Sawada</i>	42
---	----

Nuclear Clock: Study on decay of actively pumped isomeric state of ^{229}Th nuclei <i>T. Hiraki, K. Okai and A. Yoshimi</i>	44
--	----

Slow Dynamics: Development of a quasi-elastic gamma-ray scattering technique to reveal nanosecond atomic dynamics <i>M. Saito</i>	46
---	----

Depth Sensitive Hyperfine Spectroscopy: 3D surface analysis using a synchrotron Mössbauer source <i>T. Mitsuï and K. Fujiwara</i>	48
---	----

Two-dimensional Nanomaterial: Work function lowering of photo- and thermionic-cathode by two-dimensional nanomaterial coating beyond anti-corrosion protection <i>H. Yamaguchi</i>	50
--	----

Glass Ceramics: Formation of a zirconium oxide crystal nucleus in the initial nucleation stage in aluminosilicate glass investigated by X-ray multiscale analysis <i>Y. Onodera, Y. Takimoto and S. Kohara</i>	52
--	----

Phase-change Materials: Pressure-induced reversal of Peierls-like distortions elicits the amorphous-amorphous transition in GeTe and GeSe <i>T. Fujita, Y. Kono and R. Mazzarello</i>	54
---	----

X-ray Fluorescence Holography: Nanophase separation in $\text{K}_{1-x}\text{Ca}_x\text{C}_8$ revealed by X-ray fluorescence holography <i>N. Happo, K. Hayashi and Y. Kubozono</i>	56
--	----

XMCD, Spintronics: Uniform magnetic structure revealed by X-ray magnetic circular dichroism and spin-torque diode effect in $\text{Mn}_3\text{Sn}/\text{W}$ epitaxial bilayers <i>S. Sakamoto and S. Miwa</i>	58
---	----

Laser Pulse Irradiation PEEM: Investigation of helicity-dependent optical switching of ferrimagnetic Gd–Fe–Co films <i>T. Ohkochi</i>	60
---	----

Magnetic Structure by REXS: Commensurate locking of magnetic skyrmion and crystal lattice in $\text{Gd}_3\text{Ru}_4\text{Al}_{12}$ <i>M. Hirschberger, Y. Tanaka and H. Ohsumi</i>	62
---	----

Voltage-based AFM Spintronics: Giant modulation of antiferromagnetic spin reversal field by magnetoelectric effect <i>Y. Shiratsuchi</i>	64
--	----

Chemical Science

Electron Density Visualization: Exploration of chemical bonds in real-space <i>T. Hara and H. Sawa</i>	66
Bending Stress: Investigation of the electronic state of poly-tetrafluoroethylene under bending stress using near-ambient pressure hard X-ray photoelectron spectroscopy <i>K. Fujitani and S. Suzuki</i>	68
Fluoropolymers: Revisit to the old-but-totally-unknown fluorine polymer — atactic poly(vinylene fluoride) is amorphous ? — <i>R. Yano, K. Tashiro and S. Sasaki</i>	70
Electrode Roughness: Oxidative surface roughening of Pt electrode depending on electrolyte cations <i>T. Kumeda and M. Nakamura</i>	72
XAFS-CT Imaging: Unveiling adsorption distribution in a metal–organic framework crystal with 3D XAFS-CT mapping <i>H. Sakamoto</i>	74
High-resolution XANES: <i>In situ</i> HERFD-XANES study on CO ₂ activation on niobium oxide clusters <i>S. Yamazoe</i>	76
Solid-state Battery: Double-layered perovskite positive electrode with high capacity involving O–O bond formation for all-solid-state fluoride-ion batteries <i>K. Yamamoto</i>	78
Citosan Hydrogel, FTIR: Reconstruction of chitosan network order using the meniscus splitting method for design of pH-responsive materials <i>T. K. L. Nguyen, Y. Ikemoto and K. Okeyoshi</i>	80
Photovoltaic Device: Advanced characterization of passivation layers in perovskite solar cells via GIWAXS <i>N. Shibayama</i>	82
Metal Oxide Nanoparticles: Valence fluctuation in ultrasmall CeO ₂ nanoparticles <i>A. Yoko, K. Ninomiya and M. Nishibori</i>	84
Radium Adsorption: A systematic understanding of adsorption reaction on clay minerals focusing on radium as a key element <i>A. Yamaguchi, M. Okumura and Y. Takahashi</i>	86
Transition Edge Sensor: Visualization of the accurate distribution of trace uranium in environmental sample using superconducting technology <i>T. Yomogida, S. Yamada and Y. Takahashi</i>	88

Earth & Planetary Science

Water Effect: Measuring the effect of water on the seismic wave and its application to the lithosphere and asthenosphere boundary <i>C. Liu and T. Yoshino</i>	90
After Earthquake: Transient creep in olivine controls the post-seismic deformation <i>T. Ohuchi</i>	92
Water Escape: Does water escape from subducted slabs at the core-mantle boundary? <i>Y. Tsumumi and K. Hirose</i>	94

Industrial Applications

Hair Care: Mechanism of frizz phenomenon occurring in bleached hair <i>J. Kamikado, N. Fujiwara and H. Kimura</i>	96
Polymer Dynamics: Discovery of anisotropy in Johari–Goldstein- β process of stretched crosslinked polybutadiene by time-domain interferometry <i>R. Mashita and M. Saito</i>	98
Oxygen Evolution Reaction: Hexavalent iridium oxide for proton-exchange membrane water electrolysis <i>A. Li, S. Kong and R. Nakamura</i>	100

Accelerators & Beamlines Frontiers 102

SPRING-8

New Apparatus, Upgrades & Methodology

• Sub-micrometer focusing of intense 100 keV X-rays with multilayer reflective optics <i>T. Koyama</i>	104
• High-throughput and high-resolution powder X-ray diffractometer with innovative automation system <i>S. Kawaguchi</i>	106
• Ultracompact mirror device for forming 20-nm achromatic soft-X-ray focus toward multimodal and multicolor nanoanalyses <i>T. Shimamura and H. Mimura</i>	108
• Time-resolved anomalous small angle X-ray scattering at BL28XU <i>M. Takenaka</i>	110

SACLA

Beam Performance - Introducing 476 MHz solid-state amplifiers	112
