<b>BL01B1</b>		
Studies on the Structure of Pd Supported on Zeolites by XAFS	K. OKUMURA	1
Studies on the Structure of WO <sub>3</sub> Dispersed over ZrO <sub>2</sub> by XAFS	K. OKUMURA	2
Solvation Structures of Iodide Anion in Various Solvents	I. WATANABE	3
Total Reflection XAFS of Aqueous Solution Surface	I. WATANABE	4
XAFS Study on Liquid Te and I under high temperature and high pressure	Y. KATAYAMA	5
XAFS Study on EuC <sub>60</sub>	Y. KUBOZONO	6
XAFS Analysis of Dilute Zr, Nb and Mo Species in Metal Oxide Matrices	T. TANAKA	7
Characterization of BL01B1	S. EMURA	8
General evaluation of XAFS beamline I -XAFS in the high energy region-	Y. NISHIHATA	9
Evaluation of Energy Resolution of BL01B1 Using XANES Spectra of Various Metal Ions	T. TANAKA	10
XAFS Studies of Local Structure of Thin Film of Alkali Halide Single Crystals	T. MURATA	11
Preliminary results of fluorescence Cu K-edge XAFS spectra and high energy K-edge XAFS spectra of AgI-related Samples	H. KAGEYAMA	12
XAFS spectrum observation system at BL01B1	M. TAKAHASHI	13
Comparison of conversion electron yield and transmission EuK -XAFS spectra for Eu <sub>2</sub> O <sub>2</sub> CN <sub>2</sub>	M. TAKAHASHI	14
EXAFS Measurements of Nd <sup>3+</sup> -doped Alkali Silicate Glasses on the Nd K-edge	H. YAMAGUCHI	15
<b>BL02B1</b>		
High-Resolution Powder Diffraction Experiments at BL02B1	H. TORAYA	16
Precursor Phenomena on the First-Order Phase Transition in Ferroelastic Compounds	Y. KUROIWA	17
A Structural Study of Fullerene Compounds by the Maximum Entropy Method	M. TAKATA	18
Structural Fluctuation in Ternary Alloys	K. OHSHIMA	19
Lattice Modulation and Charge Ordering Associated with the Spin Ordering in CeP	Y. NODA	20
Phase Transition of Hexagonal BaTiO <sub>3</sub>	Y. NODA	21
Precise Crystal Structure Analysis of K <sub>3</sub> H(SO <sub>4</sub> ) <sub>2</sub> by High Energy X-ray Diffraction Method	H. KASATANI	22
A preliminary Study on the surface diffraction from SiO <sub>2</sub> /Si(001) interface	I. TAKAHASHI	23

Structure refinements of a GeO <sub>2</sub> rutile single crystal at 6GPa using hard X-rays of 25 and 50 keV	T. HATTORI	24
Highly Accurate Measurement of Electron Density Distribution in Transition-Metal Complexes with SR and Vacuum Camera	K. TANAKA	25
Single Crystal Analyses of e-O <sub>2</sub> High-Pressure Phase of Solid Oxygen	Y. AKAHAMA	26
Development of Electronic Excited State Crystallography by Modulation Method with Imaging Plate Detector	Y. OZAWA	27
X-ray Diffraction Study on Ultra-Thin Barium Titanate Films Grown by Reactive Evaporation	K. SAKAUE	28
X-ray Structure Analysis of Host-Guest Organic MicroCrystals	Y. TAKENAKA	29
Micro-Crystal Structure Analysis and Its Application to the Study of Photo-Induced Structural Change of the Metal Complex	K. TORIUMI	30
High-resolution X-ray Diffraction Study on Artificially Grown Quasi-Periodic Superlattices	K. SAKAUE	31

#### **BL04B1**

Structure and Equation of State Study of Mantle Minerals Through in situ X-ray Observaion	T. YAGI	32
In situ X-ray Diffraction study of the phase transformations, melting behaviours, and rheological properties of the earth's materials at high pressure and high temperature	T. IRIFUNE	33
In situ X-ray diffraction study on kinetics of decomposition of spinel Mg <sub>2</sub> SiO <sub>4</sub> at high pressure and temperature	T. KUBO	34
Pressure Induced Phase Transition of CdI <sub>2</sub> -type PbI <sub>2</sub>	O. OHTAKA	35
Precise determination of phase relations in the system Mg <sub>2</sub> SiO <sub>4</sub> -Fe <sub>2</sub> SiO <sub>4</sub> at high pressures	T. KATSURA	36
In situ observation of graphite to diamond transition using catalysts	W. UTSUMI	37
The determination of the P-T phase diagram of PbZrO <sub>3</sub>	S. ENDO	38
X-ray Diffraction Measurements for Expanded Fluid Selenium	M. INUI	39
X-ray Diffraction Measurements for Expanded Fluid Mercury	K. TAMURA	40
In-situ observation of first sharp diffraction peak for amorphous SiO <sub>2</sub> under high pressures	N. KITAMURA	41

#### **BL08W**

Successful Operation of Noble Equipment for Magnetic Compton-Profile Measurements at the BL08W	N. SAKAI	42
Measurement of Degree of Circular Polarization of 274-keV X-Rays	M. MIZUMAKI	43
Performance of a Monochromator for 300-keV X-Rays	H. YAMAOKA	44

**BL09XU**

The study of the Perturbed Nuclear Resonant Scattering	T. MITSUI	45
X-ray inelastic scattering of myoglobin	T. HARAMI	46
Surface Structure analysis of solid liquid interfaces	M. NAKAMURA	47
Development of Nuclear Resonant Inelastic Scattering Technique	M. SETO	48
Performance Test of the Goniometer for Surface and Interface Analysis	T. TAKAHASHI	49
Nuclear-Resonance Scattering of Ferromagnetic Amorphous Alloy	S. NASU	50
Nuclear resonant scattering by the nuclei with high transition energy	Y. YODA	51
Fundamental process of nuclear resonant scattering	Y. YODA	52

**BL10XU**

Structure Analysis of Tetrahedral-Molecular Crystal and Amorphous at High Pressure	N. HAMAYA	53
Structural Phase Transition of Molecular Solids under High Pressure	H. KAWAMURA	54
X-ray diffraction study of sulfur laser-heated at 11GPa	N. SAKURAI	55
Density of Luquid Te and Bi under High Temperature and High Presure	Y. KATAYAMA	56
Crystal Structure Analyses of Solid Oxygen High-Pressure Phases and Research for Molecular Dissociation	Y. AKAHAMA	57

**BL27SU**

High Resolution Resonant Auger Electron Spectroscopy of Atoms and Molecules	I. H. SUZUKI	58
---	--------------	----

**BL39XU**

X-ray fluorescence holography of Zn in GaAs:Zn	K. HAYASHI	59
Development of high energy resolution detectors for trace chemical characterization	K. SAKURAI	60
Chemical characterization of ultra trace metals in small liquid drop	K. SAKURAI	61
Analyses of thin films interfaces by X-ray fluorescence and scattering using total reflection	K. SAKURAI	62
X-ray Mangetic Diffraction of Iron with A Phase Plate on Au Undulator Beamline	M. ITO	63
Bio-medical application of Total reflection X-ray fluorescence analysis	I. NAKAI	64
High resolution x-ray fluorescence spectroscopy and spin selective XAFS	S. HAYAKAWA	65
Chemical state analysis of trace elements with a scanning x-ray microprobe	S. HAYAKAWA	66
Efficiency Test of Diamond Phase Retarder and Polarization Analysis	H. MARUYAMA	67

X-ray Resonant Magnetic Scattering and Polarization Dependence	H. MARUYAMA	68
XMCD Measurements at K-Edge using Diamond Phase Retarder	H. MARUYAMA	69
XMCD Measurements at Pt L <sub>3</sub> -Edge in Fe-Pt Alloys	H. MARUYAMA	70
<b><i>BL41XU</i></b>		
Structure analysis of bacterial flagellar filament by X-ray fiber diffraction	K. HASEGAWA	71
Structure of Diol Dehydrase containing Vitamin B12 analogue	N. SHIBATA	72
X-ray Crystallographic Study of Pink Color Chromoprotein from <i>Pleurotus Salmoneostramineus</i> L.Vass	Y. KAI	73
X-ray crystallographic Studies on Tobacco Necrosis Virus, Peroxidase, and $\alpha$ -Amylase inhibitor	K. FUKUYAMA	74
Mechanism for thermo-stabilization of enzymes from view of the three dimensional structure	Y. YOSHIKE	75
X-ray crystallography of aminoacyl-tRNA synthetases complexed with tRNA	O. NUREKI	76
X-ray crystallographic studies on hematopoietic and lipocalin type PGDS	M. MIYANO	77
Crystal structure analysis of $\alpha$ - and $\beta$ -amylases from <i>Bacillus</i> species	T. YAMANE	78
Test for the Routine Structure Analysis of Biological Macromolecules at the Bio-Crystallography Beamline	N. KAMIYA	79
Tuning of the Bio-Crystallography Beamline	Y. KAWANO	80
X-ray crystal structure analysis of ribosomal protein S7 by MAD	A. NAKAGAWA	81
Evaluation of Performance of the Bio-Crystallography Beamline by Means of Refinement of High-Resolution Crystal Structure	M. FUJIHASHI	82
Data Collection of Phenylethylamine Oxidase from <i>Arthrobacter globiformis</i> at Low Temperature	H. YAMAGUCHI	83
Structures of <i>Escherichia coli</i> and Mouse 8-Oxo-dGTPase that Hydrolyze the Mutagenic 8-Oxo-dGTP to 8-Oxo-dGMP	Y. YAMAGATA	84
High Resolution X-ray Crystallographic Analysis of Cytochrome c Oxidase	H. SAKAI	85
Mechanism of Proton Pumping of Cytochrome c Oxidase based on its Crystal Structure	S. YOSHIKAWA	86
X-ray fiber diffraction from the native thin filament and F-actin sols	T. ODA	87
Crystal structure of Phe-tRNA-synthetase from <i>T.thermophilus</i> in complex with phenylalanyl-adenylate	D. VASSYLYEV	88
Protein crystallography of muscle tropomyosin and complexes of tropomyosin with other proteins	Y. MAEDA	89
X-ray structure analysis of drug-resistant HIV-1 protease, and protease inhibitor complexes, and rHCAI and substrate/ inhibitor complexes	M. HOSUR	90

***BL45XU (RIKEN Beamline)***

Tests of the Small-angle Beamline for X-ray Diffraction Experiments on Skeletal Muscles	N. YAGI	91
X-ray Solution Scattering of Biological Supramolecules on an Undulator Radiation Source	Y. INOKO	92
Structural Analysis during the Photocycle of Bacteriorhodopsin revealed by Time Resolved X-ray Diffraction	F. TOKUNAGA	93
Stability of Solution Structure and Photo-Induced Structural Changes of Photoactive Yellow Protein with Use of Mutants	N. HAMADA	94
