

Contract beamline

- Contents of experiment reports

<i>title</i>	<i>proposal no.</i>	<i>first author</i>	<i>page</i>
BL24XU			
Development of High Resolution X-ray Imaging by the Refraction Contrast Method	C99A24XU-001N	Y.Tsusaka	275
X-ray Structure Analyses of Isoamylase and Related Enzymes	C99A24XU-002N	Y.Katsuya	276
X-ray structure analysis of antibodies	C99A24XU-003N	Y.Mezaki	277
Evaluation of Biocrystallography Experimental Hutch of Hyogo Beamline (BL24XU)	C99A24XU-004N	Y.Katsuya	278
Approach for Phase Problems of High-Ordered Brain Function Related and Mid-sized Molecules	C99A24XU-005N	M.Doi	279
X-Ray crystal structure analysis of human initiation factor 4E S209K mutant	C99A24XU-006N	T.Ishida	280
Crystallographic study of molecular mechanism of the thermostability of DNA binding proteins	C99A24XU-007N	H.Koike	281
Crystallgraphic analysis of proteins related to drug- design I	C99A24XU-008N	S.Misaki	282
Crystal structure analysis of helicase	C99A24XU-011N	H.Hiramatsu	283
Crystallographic analysis of proteins related to drug-design, V.	C99A24XU-012N	M.Koizumi	284
Crystallographic analysis of proteins related to drug design, VI.	C99A24XU-013N	M.Miyano	285
Crystal Structures of 1) Protein Tyrosine Phosphatase IB and 2) Ser/Thr Protein Kinase	C99A24XU-014N	S.Sugio	286
Comparison of diffraction data of trypsin crystal between BL24XU and R-AXIS IV in house.	C99A24XU-015N	I.Shiromizu	287
Crystallographic Analysis of Proteins Related to Drug Design IX	C99A24XU-016N	N.Kunishima	288
Crystallographic analysis of micro crystals II	C99A24XU-018N	K.Yanagi	289

Crystallographic analysis of microcrystals. III	C99A24XU-019N	A.Fujishima	290
XRD experiment on 1) magnetic thin films, and 2) Small Crystals	C99A24XU-023N	H.Namita	291
Crystallographic Study of the Proteins Related to DNA Repair	C99A24XU-025N	N.Kunishima	292
Structural analysis of ultra-high quality transparent conducting films	C99A24XU-029N	H.Izumi	293
Surface X-ray Diffractometer for Metalorganic Vapor Phase Epitaxy Growth	C99A24XU-030N	T.Kawamura	294
Observation of Crack Initiation in Structural Materials by Refraction Contrast X-ray Imaging	C99A24XU-033N	T.Nakayama	295
Formation of X-Ray Microbeam Using Ta Phase Zone Plate and Its Application to Scanning X-Ray Microscope	C99A24XU-034N	Y.Kagoshima	296
Development of Parallel X-ray Microbeam and Its Applications	C99A24XU-035N	Y.Tsusaka	297
Precise X-ray Diffraction Measurements using Hard X-ray Microbeam Formed by Asymmetric Diffraction	C99A24XU-036N	S.Kimura	298
X-ray Phase contrast imaging study of activated carbon/carbon composite	C99A24XU-037N	K.Kobayashi	299
Structural modulation of carbides and nitrides by X-ray irradiation using synchrotron radiation	C99A24XU-038N	F.Sato	300
Characterization of polished silicon surfaces by the grazing incidence X-ray diffraction topography	C99A24XU-040N	T.Katoh	301
One dimensional expansion of phase contrast image from micro-stripe patterns	C99A24XU-041N	K.Tani	302
Development of imaging techniques using monochromatic SR with high parallelity	C99A24XU-042N	M.Ando	303
Detection of metastatic lung cancer of nude mice with Synchrotron Radiation and Au-NPe6	C99A24XU-043N	K.Aizawa	304
Detection resolution of small nodules in the lung of the rats using refraction imaging	C99A24XU-044N	K.Yamasaki	305
Characterization of Subsurface Microstructure and Microcrack for Metallic Materials	C99A24XU-046N	O.Umezawa	306
Phase-Contrast X-Ray Imaging of Trace Forensic Samples Using Both Vertical and Horizontally Expanded Synchrotron Radiation X-Rays with Asymmetric Bragg Reflection	C99A24XU-048N	T.Ninomiya	307
